Only Nik-O-Lok offers these exclusive features: durable brass construction with heavy chrome finish—non-pick cash door controlled by a patented key—auditor-approved coin meter that counts traffic for you.

Locks are available for individual toilet booths, and for showers and complete dressing rooms . . . in 5c, 10c, 25c and 50c coin denominations.

Write or phone for complete information on the Nik-O-Lok no-investment plan.

- **NO INVESTMENT**—The Nik-O-Lok Company installs, services and maintains NIK-O-LOK equipment without expense or investment to the owner or location operator.
- **A NEW SOURCE OF INCOME**—Coin returns from Nik-O-Lok installations are shared with owner or location operator on an equitable basis.
- **NO SERVICE, REPAIR, OR REPLACEMENT COSTS**—Regular inspections are made by Nik-O-Lok's trained personnel. Over a thousand trained service people, located in branches across the country, are available to quickly solve your maintenance problems.
- **MAXIMUM SANITATION FOR PATRONS**—Nik-O-Lok equipped toilet facilities are guarded against misuse and reduce contamination hazards.
- **PREFERRED FACILITIES**—People prefer pay toilets. A recent survey disclosed that both men and women prefer the privacy and sanitation of a coin-operated, locked toilet.
- **NO BOOKKEEPING PROBLEM FOR OWNER**—Nik-O-Lok's coin meter counts traffic for you. This dependable meter meets with the approval of all auditing departments.
- **PERSONAL CONVENIENCE**—Pass keys are provided for use of authorized personnel.
- **YOU TAKE NO RISK**—Nik-O-Lok provides public liability insurance.
- **DOOR HARDWARE INCLUDED**—No additional hardware to provide. NIK-O-LOK furnishes complete installation of Nik-O-Lok surface spring hinges. See page 3.

## MODERN SURFACE SPRING HINGES SUPPLIED WITH ALL NEW LOCK INSTALLATIONS

**NIK-O-LOK**, for almost half a century the leader in the field of coin-operated toilet locks, now makes available this sensational new aluminum alloy surface spring hinge to meet the need for a better method of suspending lavatory and other similar type doors.

**NIK-O-LOK'S** exclusive design provides sensational advances in quality of material and performance—as well as in streamlined appearance. Embodying the finest principles of workmanship, the new hinge makes maintenance as easy as A, B, C.

**NIK-O-LOK** engineering turns a dream into a reality. Years and years of experimenting produced this miracle hinge of lightweight material, yet of the greatest strength and durability.

**FASTENING FOR HOLLOW CORE DOORS**—Special bushings are provided for this purpose.

### SPECIFICATIONS

### HINGE INSTALLATION INFORMATION

Hinges must be installed square and in line with jamb, with winding adjustment always at top.

Standard drilling template furnished if requested.

Standard equipment for mounting one pair hinges:

Eight  $1\frac{1}{4}$ " x 20 Brass studs (will take up to  $2\frac{1}{8}$ " door or jamb).

Sixteen Chrome plated acorn nuts.

Eight  $1\frac{1}{16}$ " washers.

Eight lock washers.

1" x No. 14 round head sheet metal screws may be had when requested.

- Special aluminum alloy permits reduction in weight at no sacrifice in strength or wearing quality.
- Special aluminum alloy retains high luster and makes hinge easy to clean with ordinary cleaning compounds.
- Streamlined design adds that modern appearance, eliminates protruding parts that catch dirt and tear cleaning rags or clothing.
- Has tamper-proof mechanism—sealed in barrel with special socket head pivot screws that can't be removed except with special tools.
- Special oil-tempered spring permits greater resiliency, strength and durability.
- Tension spring operates freely and continuously without impairment because it has diametric ends securely anchored in slotted lugs at top and at bottom.
- Has floating bearings at top and at bottom assuring easy operation. Bearings will withstand maximum wear.
- Winding lug permits adjustment of tension to return door to closed position smoothly and with correct degree of force.

## DESIGN GOODWILL INTO REST ROOM INSTALLATIONS

### SPECIFY **NIK-O-LOK** PULLDOWN UTILITY SHELVES

Shows shelf in position for use.

THE PULL-DOWN Utility Shelf folded in a vacant booth.

The Nik-O-Lok Pulldown Utility Shelf is an attractive, rugged, folding shelf which is self-clearing. Installed on the side-wall of the booth, it provides a convenient place to lay parcels, purse and gloves, or to hang coats, hats and umbrellas.

Made of 18 gauge steel, with baked enamel or chrome finish, the Pulldown Utility Shelf has rolled edges, rounded corners and cigarette holder. Although it weighs only about 2 1/2 pounds, it will support over 150 pounds when mounted properly.

Easily installed, the Pulldown Utility Shelf requires no special fasteners. Only 2 holes need be drilled in the side-wall. Mounting studs with chrome plated acorn nuts and washers are provided with each unit.

**COMPLAINTS REDUCED**—Nothing can be stolen from the shelf as it is always in full view of the occupant. Since the shelf must be closed before exit, it compels the removal of all articles and nothing can be forgotten.

**DURABLE AND RUGGED**—The shelf is designed for hard use but is neat, simple and attractive in design. It fits left or right hand doors. When not in use, a concealed spring holds the shelf in an upright position and out of the way. When open for service, it forms an ample storage tray.

**SELF-CLEARING**—After each use, the shelf is folded in an upright position to release the door. Therefore, each time the shelf is cleared of all articles.

#### SPECIFICATIONS

**SHELF TRAY:** 18 gauge No. 3 Bright Carbon Steel.

**PRIME COAT:** Zinc Chromate.

**FINISH ENAMEL:** No. 165 Gray, baked at 360° for 45 minutes.

**CHROME FINISH:** Nickel plated over heavy copper base, finished in lustrous chrome plate.

**MOUNTING BRACKET:** Heavy die-cast aluminum, finished in black wrinkle baked at 360° for 20 minutes.

**INSTALLATION:** Drill two  $1\frac{1}{64}$ " holes  $4\frac{5}{16}$ " apart (center to center) at desired height from floor, at a suitable distance from door jamb (6" to 12").
